

# FUTUREGRO

**CLOUD AGRO**LTD  
Organic Nutrient Recycling

**SMART FEED**<sup>TM</sup>

ORGANIC FERTILISER  
+  
SOIL CONDITIONERS

## WHAT IS FUTUREGRO?

**FUTUREGRO** IS A HIGH-QUALITY, FULLY DECOMPOSED ORGANIC FERTILISER THAT ADDS NUTRIENTS, IMPROVES SOIL STRUCTURE, AND STIMULATES MICROBIAL ACTION.

**6x** STRONGER THAN FARMYARD MANURE

**50x** MORE EFFECTIVE THAN GREEN WASTE

**FUTUREGRO** FERTILISER IS AN UPGRADE TO THE TRADITIONAL PRACTICE OF MANURE AND GREEN WASTE APPLICATION.

APPLY (AVERAGE 1 TON PER ACRE PER YEAR) FUTUREGRO TO YOUR SOIL TO SEE HEALTHIER CROPS AND 25% HIGHER YIELDS THIS SEASON.

## WHEN WILL YOU USE IT?

- 1 PREPARE**  
BEFORE PLANTING
- 2 BOOST**  
AFTER BUDBURST
- 3 REPLENISH**  
AFTER AUTUMN HARVEST

## ABOUT US

**CLOUD AGRO LTD**'S BRANDED PRODUCTS ARE PRODUCED FROM ORGANIC NUTRIENT RECYCLING AND ENSURE BEST PRACTICE FOR SUSTAINABLE AGRICULTURE.

OUR E-COMMERCE BUSINESS FOR FARMERS REDUCES OUR CARBON FOOTPRINT AND OPTIMISES THE 'COST:QUALITY' RATIO FOR ANY INPUT PRODUCTS IN CROP AND LIVESTOCK PRODUCTION.

**SMART FEED**<sup>TM</sup> IS THE GREEN SCIENCE DRIVING FUTURE AGRICULTURAL SYSTEMS AND 100% NATURAL PRODUCTS LIKE **FUTUREGRO** FOR FARMERS.

WE ARE PROUDLY ENDORSED BY INDEPENDENT VITICULTURE CONSULTANTS LIKE:

  
McNeill Vineyard Management Ltd

## ORGANIC FERTILISER + SOIL CONDITIONERS WITH PELLETTED POULTRY MANURE

### WHAT ARE THE BENEFITS?

#### ENHANCES SOIL FERTILITY

FUTUREGRO is rich in humus, organic matter, and a variety of macro- and micro-nutrients, which help to create a "living soil", rich in carbon and beneficial microorganisms. It helps to balance soil pH and also enhances water retention.

#### INCREASES YIELD

FUTUREGRO is a more powerful solution than animal manure and green waste. With greater density and availability of nutrients, it produces greater yields.

#### IMPROVES CROP TOLERANCE

With FUTUREGRO, as the plant grows stronger with enhanced nutrition and more balanced soils, crops are able to ward off disease vectors and pest attacks. Animal manure does the opposite: its application often leads to the spread of weed seeds, disease vectors, and pathogens.

#### REDUCES NEED FOR CHEMICAL FERTILISER

Repeated application of FUTUREGRO helps nutrients become more available to crops, making soil more fertile. Over time, less chemical fertiliser is needed.

#### OFFERS CONSISTENT QUALITY

Quality control for animal manure is poor, and it contains a large proportion of inert material or soil. By contrast, external laboratories test every batch of FUTUREGRO, to guarantee minimum nutrient quantities. FUTUREGRO is calibrated and packaged into 20kg bags (or 1ton bulk bags), with consistent quality and amounts, every time you order.

#### SUPPORT BEST PRACTICE

CLOUD AGRO's manufacturing processes undergo strict nutrient and pathogen analyses to maintain EEC certification necessary for internal and external farm compliance. Use of animal manure is typically not allowed by best-practice audit standards.

#### HIGH SAFETY STANDARDS

FUTUREGRO is a high-quality and safe organic input for your farm. Poultry manure is composted and treated to create FUTUREGRO. The heat treatment process eliminates harmful pathogens to make the product safe to use. After the processing period, the fertiliser cures and stabilises and is then screened and pelleted to produce the finished product. Finally, our fertiliser is tested by independent laboratories using EEC certified processes.

## FUTUREGRO'S SUCCESS IN NUMBERS

# 25%

Average Yield Increase

# 700

Extra Earnings on High Value Crops (£/acre)

# 50

Savings on Chemical Fertiliser (£/acre)

ANALYSIS	NPK 4:3:3
	%
Dry Matter (DM)	88
Organic Matter (OM)	65
